General Processes:

- Continually update expected Go Live Dates (this is part of the sales force accountability score). This is a requirement to create the opportunity and should be updated as the account gets closer to going live.
- Retail Leads, any source – Return as "Not a Restaurant" and add link to chat.
    - If you want to continue to work or close the deal, please have a new lead created under Prospecting Lead List
- We are adding the Pre-Launch Specialist, Install Date under Next Steps and Install status to the Sales Force Opportunity
- When you close lost an opportunity, please don't use Cancellation (use application expired for example).
    - Cancellation is what is used by customer service when a merchant closes their MID.

Underwriting Pends:

- Please include salesadmins@shift4.com on all correspondence for underwriting to ensure coverage
    - All notes for pending underwriting, including the initial request, will be added to Salesforce.
    - Admins will add pending info to Salesforce, make initial call and send initial email.
    - Sales rep needs to follow up within 24 hours if no response to initial request.
        - On the application call, please let the merchant know we have an admin team that will reach out for any possibly information needed and they are great to work with.
        - Once the application is signed, please send a thank you email and include asking for a voided check (if not validated), driver's license and a referral (include referral rock link). Do this on all signed accounts and they will get through the funnel faster.

Calls and Call Time:

- Use CX as much as possible, callback on CX once they know it's you.
    - Log call in SF each time, note cell when used
- We are looking daily at stats at this plays into rotation, job security, etc.
