SkyTab POS – Inbound Sales Script & Talking Points

1. Greeting & Introduction:

Hi [Merchant Name], this is [Your Name] with SkyTab by Shift4 — thanks for reaching out about our POS system! I'd love to learn a little about your business and show you how we can help.

- Are you already open, or getting ready to launch soon?

2. Discovery:

Got it — just a few quick questions so I can make sure we line up the right setup for you:

• What's the style of your restaurant? — Full-service, quick-service, food truck, or bar/lounge?
• About how many devices or stations will you need?
• Will you be offering online ordering or delivery?
• Have you used a POS before, or will this be your first system?

If new → perfect — we work with a ton of startups and new openings. We handle the full install, menu build, and training so you're 100% ready before opening day.

If existing → excellent — you will be assigned a launch specialist that will help import your menu and data and handle everything so you can make the switch to Shift4 with zero downtime.

3. Credibility: Who We Are

SkyTab is the restaurant-built POS platform powered by Shift4, a global commerce-technology company processing billions of transactions every year for more than 200,000 businesses worldwide.

Our technology powers some of the biggest names in food, hospitality, and entertainment, including:

• KFC
• Outback Steakhouse
• Denny's
• Dairy Queen
• Arby's

We also handle transactions for about 75% of all major U.S. stadiums, such as:

• MetLife Stadium – NY Giants & Jets
• Hard Rock Stadium – Miami Dolphins
• Crypto.com Arena– Los Angeles Lakers and Los Angeles Kings
• Moda Center – Portland Trail Blazers

And we support hotel groups like Choice Hotels International and Great Wolf Resorts and have a presence in roughly 50% of the Las Vegas Strip hotels.

So whether you're running a food truck, opening your first spot, or managing multiple locations, you're using the same enterprise-grade tech trusted by global brands, stadiums, and hotels.

4. Pricing & what's included:

Here's the best part — there's zero cost upfront.

It's $29.99 per month for each device, plus a $20 per month account software fee.

Here's what comes with that:

- SkyTab POS software with free automatic updates
- Zero upfront cost for hardware
- Free onsite installation and training
- Free menu build and configuration — we do it all
- Online ordering built in
- Loyalty and marketing tools
- Free Restaurant Website
- Built In Gift Card Program
- Tableside, mobile, and contactless payments
- Reservations and waitlist
- Inventory management
- Employee time clock & labor tracking
- Cloud reporting & real-time analytics
- 24/7 Support

We also offer an optional employee scheduling software for $35 per month if you want more advanced scheduling capabilities — completely optional.

5. Advantage Program:

We also include our Advantage Program, which can bring your processing costs down to virtually zero.
It uses Dual Pricing or Cash Discount, built directly into SkyTab, so you can legally and transparently pass through a small fee and keep more of your revenue.

It's fully compliant and used successfully by restaurants and food trucks across the country.

6. Integrations:

SkyTab integrates directly with DoorDash, Uber Eats, and Grubhub, so all your delivery and online orders feed straight into the POS — no extra tablets, no manual entry, no missed orders.

7. Tailored Pitch by restaurant style:

- Full-Service Restaurant: Tableside ordering and payment for faster turns and higher tips.
- Quick-Service / Fast-Casual: Lightning-fast checkout and integrated online ordering.
- Bar / Lounge: Pre-auths, tab management, and contactless pay for speed and security.
- Food Truck: Lightweight, wireless, and runs on Wi-Fi or LTE — even offline.
- New Restaurant: Installation, menu creation, and training handled for you.

8. Value Recap:

- Zero cost upfront
- $29 per month per device
- $20 per month account software fee
- Free installation, menu build & training
- Free Website
- Inventory, labor, loyalty, online ordering, & reporting
- Advantage Program – nearly zero processing fees
- 24/7 support, backed by Shift4 — the same company trusted by KFC, Outback, and Choice Hotels.

9. Close for the Sale:

Based on what you've told me, SkyTab sounds like a perfect fit for your business.

Let's go ahead and start your application together right now — it only takes a few minutes. I'll walk you through it step by step, then send you a quick secure link to sign and confirm your setup.

Once that's done, we'll ship your hardware and schedule your installation and menu build.

Optional - If you'd prefer to see a quick demo first, I can walk you through the software, then we'll complete the application together right after.

10. Objection Handling:

We're still building out / not open yet → We'll get everything built and installed so you're ready for opening day.

I want to compare systems first → You won't find another system that includes hardware, menu build, and install for $29 a month.

We're happy with our current POS → Many felt the same until they saw the savings.

Switching sounds like a hassle → We do all the work — installation, training, and menu build are free.

What's the cost again? → No upfront cost, just $29 per month per device, and nearly zero fees with the Advantage Program.

11. Confirmation & Wrap-Up:

Perfect — I just sent you the application link. Go ahead and open that while we're on the line — I'll walk you through it.

Once you've signed, our onboarding team will reach out to confirm your shipping info and schedule your installation and menu build. You'll get your hardware and be ready to go live right away.
